

### Problem 3:

### Challenging Stuff

#### General Statement:

Now, you have some serious skills. Let's try something more challenging

#### Input:

The first line of the data file will contain a word. The remaining lines will each contain a word. There is an undetermined number of words in the file.

#### Output:

Determine how many times the first word is repeated in the remaining words, and print it. Do not include the first line in your count.

<b>Name of Data File:</b>	Challenging.in
<b>Name of Program:</b>	Challenging.java
<b>Name of Class File:</b>	Challenging.class

#### Sample Input:

Bob  
Jim  
John  
Bob  
Joe  
Cindy  
Anita  
Bob  
Eric  
Tom  
Bob  
Bryan  
Janet  
Shane  
Bob  
Kayla

#### Sample Output:

4
