

Problem 1:

Print This Stuff

General Statement:

You are just learning Java, and you have decided you want to do programming contests because you like Saturday mornings and pizza. You need to learn how to read from a file and loop. Good luck!

Input:

The data file will contain a number which specifies how many lines are to follow. Each remaining line will contain a phrase.

Output:

Print each phrase on its own line.

Name of Data File:	Print.in
Name of Program:	Print.java
Name of Class File:	Print.class

Sample Input:

```
3
Programming is fun!
I like pizza
My team is awesome.
```

Sample Output:

```
Programming is fun!
I like pizza
My team is awesome.
```
